The **Brainy Baby Learning Library™** has been created to help you introduce a variety of important early-learning fundamentals to your baby, toddler and preschool-age child, and is designed to maximize your child's learning! Each program is 45 minutes long, and each one is crafted with a creative mix of reality-based visuals and colorful graphics, combined with both classical music and fun, kid-friendly songs!

All videos and DVDs in the Brainy Baby® series are designed for your and your child to watch together. The programs are specially paced for young viewers to first capture their attention, and then allow for a "teachable moment" to occur. This slower pacing also makes it easy for you to pause the video or DVD at any time to point out familiar objects or repeat words together.
